ATTN HORSEMEN: Multi-State Equine Herpes Virus (EVH-1) Outbreak in Cutting Horses. Horse-to-horse contact, aerosol transmission, and contaminated hands, equipment, tack, and feed all play a role in disease spread. While the true extent of this disease outbreak is uncertain; there is clearly a very significant elevated risk of EHM cases at this time. EHV-1 strains with a high incidence of EHM are thought to carry very high viral loads and therefore carry a likelihood of spreading.

ATTN HORSEMEN: if you are not able to saddle your horse for the races, please arrange for a substitute and inform the stewards. If a valet has to
